

STUDIO
RICE

BY CÉLESTE DURRY

SPRING - SUMMER 2023

ENTROPIQUES X JULIEN COLOMBIER

SS 23

A true ode to nature, the artistic universe of the painter Julien Colomnier is both dreamlike and flamboyant, populated by jungles or lush and colourful tropical forests that blur the lines between the figurative and the decorative.

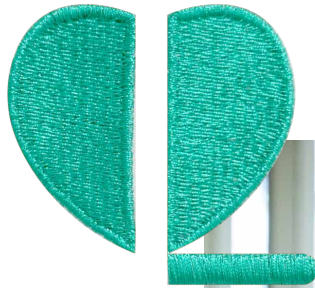

His use of floral motifs as a graphic element, and his vision of colour are in perfect harmony with the universe of Studio Rice. With the help of the Franche Dutel textile manufacturer, we have transposed his paintings onto exclusive jacquard prints.

The arrival of summer is celebrated with an explosion of patterns : large leaves woven in relief, fluid and shiny jacquards in ultramarine, fire red or turquoise, which accompany the oversize 3D mesh pieces in optical white to create fluid silhouettes with ample volume.

A collection of coordinated travel bags, totes, handbags, belt bags and clutches finish off the looks.
